M E D I C A L
An Ergotron Company

Keep your clinical staff moving, free up
your IT staff from workstation management,
and reduce your total cost of ownership.

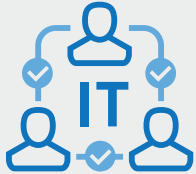

| POWERING INTELLIGENT CARE |

INDUSTRY CHALLENGES

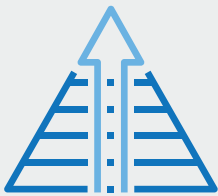

NURSES WANT TO SPEND MORE TIME WITH PATIENTS

Solutions designed to reduce fatigue and allow nurses to stay focused on patient care.

INCREASED DEMAND ON IT AND CLINICAL STAFF

Technology that empowers IT support and clinical staff to efficiently manage and personalize devices that drive better customer care.

INCREASED DEMAND FOR FINANCIAL RETURN

Services that maximize the value of your investment and extend the life of your capital purchases.

GAIN VISIBILITY

Reduce the strain on your IT staff and increase their visibility by managing your EHR workstations with **Rhythm Mobile Device Management** cloud-based fleet management solution.

IT benefits:

- Diagnostic notifications for quicker repairs
- Patented battery replacement calendar
- Run location, drift and utilization reports
- Location services with BLE-enhanced RTLS
- API integration for Active MS Directory and ITSM

Clinical benefits:

- Universal single sign-on integration
- FollowMe personalization
- OneTouch ticketing
- Medication access security

Rhythm and the Rhythm Unplugged mobile app allow users to track the health and location of workstations and batteries in your EHR fleet

We offer a broad mix of intelligent solutions that integrate seamlessly

ENCORE WITH MOBIUSPOWER PLUS

DELIVER MOBILITY

EcoFlex™ POWER MANAGEMENT

EcoFlex Power Management powers three workflows - **Cordless**, **Flexible Cordless** and **Traditional Corded** - while using battery power more efficiently. It delivers a lighter workstation that runs 30 percent longer with fewer workflow interruptions while reducing operational costs with 30 percent fewer battery replacements.

MOBIUS POWER® CORDLESS BATTERY SYSTEM

MOBIUS POWER® + FLEXIBLE MOBILE POWER

MobiusPower® and MobiusPower Plus battery systems offer continuous mobile power to corded or cordless clinical workflows. The flexible power systems deliver mobility so nurses can capture real-time clinical documentation at the bedside limiting downtime, reducing errors and disruption to patient care.

INCREASE AVAILABILITY

Uptime READY REPLACEMENTS

Keep your clinical staff up and running and free up your IT staff to work on other priorities with **Uptime™ Ready-Replacement Service Program**. Get access to onsite, fully-provisioned workstations while we manage the service and repairs.

SmartCare™ CERTIFIED SERVICE & SUPPORT

SmartStart

Our streamlined implementation process gets your team up and running with your new technology quickly and efficiently.

FleetPro

Extend the life of your workstations and optimize the user experience with regular scheduled maintenance.

Quarterly Optimization Review

Using Rhythm's insights, we meet with you quarterly to review the performance of your mobile fleet to maximize the return on your investment.

into your clinical workflow to capture EHR data at the point of care.

Enovate Medical Clinical Device Assessment (CDA) ensures that the most appropriate technology is allocated for your clinical environment. We analyze your current equipment to determine the right mix of mobile workstations, cordless power, wall arms, wall stations, and more. The goal is to establish a

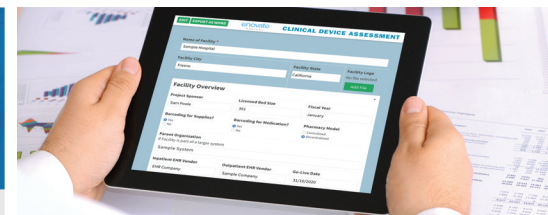

fully-integrated system with real-time charting at the bedside. With full implementation support Enovate helps to alleviate the demands on IT and the financial burdens that come with capital purchases. The CDA ensures you maximize your return on your capital investment.
